# NEW: Wheel Repair Kit black

Aluminium wheels can quickly and easily be damaged by potholes, side swiping curbs or other objects, and even by brake dust that burns into the wheel's surface. An unrepaired aluminium wheel can oxidize quickly.

The he QUIXX Wheel Repair-Kit provides an all-inclusive solution for scrapes, scratches and almost all other minor to medium damage of the wheel.

The "Liquid Aluminium" repair filler is durable for long lasting effect, and very easy to work with.

The QUIXX "Liquid Aluminium" filler will harmoniously bind to the aluminium material of the wheels.

The QUIXX "Liquid Aluminium Technology" (LAT) can even help reshape the metal visually by permanently filling the damaged areas. The former shape of the wheel can be moulded over the damaged area during application easily.

Once the defect has been repaired and/or reshaped, the metallic silver or the black paint pen will help to camouflage the refurbished area to a like new finish.

#### SPECIALS:

→ Restores light to medium scratches and scrapes on damaged alloy wheels

→ Choose between 2 different Lacquer pencil paints: silver and black

**Content:** 1 container of "Liquid Aluminium" repair putty adhesive (16 g), rim paint silver/black (12 ml), 6 special sandpapers (100 and 600 grit), 1 sanding block, 1 pair of gloves
